wastes up to 6 litres

Overfilled Kettles
usually many people boil more water than actually need

House Cleaning
Can waste up to 6 litres, containing chemical pollutants

Throwing away bottles half empty
Can accumulate up to 6 litres of wasted water

WATER WASTAGE IN THE HOME SOLUTIONS

A solution to a simple problem we all have is to fill a glass of water for brushing our teeth. This reduces our water wastage immensely. And can be easily be incorporated into anyone's daily routine

Another solution to wasting bottled water is to just simply drink the water, not only is this saving money in the long run but also keeps you hydrated

instead of using a washing machine to wash clothes multiple times a week, to save water we could wash smaller loads of clothes by hand and keep an eye on how much water we're actually using
